Description

MOTORIZED FILL SPOUT + SOUND EFFECTS! Broadway Limited Imports is proud to once again pioneer sound in HO! Our all-new Operating Water Tower is a faithful reproduction of the filling stations found on many water stops on Americas railroads. Water was an essential part of steam locomotive operation, so the Water Tower is a prototypically necessary addition to any steam route! Just attach the Water Tower to any standard 12V DC power supply (or stationary accessory DCC Decoder) and activate the motorized spout & sounds with the push of a button! Features: Durable ABS Construction Hand Painted Available Weathered & Unweathered Available Decorated & Undecorated Sound-Synchronized Vertical Fill Spout Movement Sound Equipped including sound effects for: - Spout movement squeak - Water hatch squeal & clang - Water filling - Talking Engineer Push button activated (included). Powered by standard 12V DC power supply or appropriate stationary / accessory DCC decoder such as AUXBOX or Digitrax DS64. Note that you must use the included push button to trigger the operating sequence. Unpowered Tower available in two colors for first time! Dimensions: Height: 155.2 mm Width: 86.8 mm (not including spout)
