### Description

Building on the success of their FA-1, Alco lengthened the body of the FA-2 model to provide space for an optional steam generator. This made the new model suitable for both freight and passenger service. Capitalizing on that, we've taken a few liberties in this release and added a few "what if" passenger and freight versions in some of our favorite paint schemes. Of course, you'll find prototypical paint schemes as well including Erie Lackawanna and Louisville and Nashville units complete with Hancock air whistles. If you're looking for something a little more whimsical, check out the Halloween and postwar-inspired USMC units as well. All AA sets come with two powered units, both with smoke and lighting and sounds in the lead loco. Powered and Superbass B units will fill your consists with all the power and sounds you could ever want Dual motors LED lighting Fan-driven smoke Legacy/Bluetooth control Non-operating couplers PRODUCT SPECIFICATIONS Rail Line: Louisville & Nashville Road Number: 392 Gauge: O Gauge Power: Electric Engine Type: Diesel Min Curve: O31 Dimensions: Length: 13.5" Most Recent Catalog: 2022 C2
