Description

Use the LionChief™ Remote for long distance control, great sounds, and operating multiple locomotives at the same time. Or flip switch and operate LionChief™ Plus locomotive from your current conventional transformer.

GP20 Diesel Locomotives

EMD's first turbocharged "Geep" the GP20 opened the door to a new generation of diesel locomotives. Based on the GP20 and the similar GP18, these colorful locomotives are ready to take your layout to the next level of operation.

Locomotive Features

User selected operational modes: Conventional AC transformer control mode or LionChief™ wireless remote control with AC or DC power ElectroCoupler™, on rear of tender controlled by the LionChief remote only

Operating headlight

Synchronized fan-driven smoke

On/off switches for sound and smoke

RailSounds RC™, sound system with steam chuffing and background sounds| whistle| bell| and user-activated announcements

Adjustable volume (controlled by remote only)

Constant speed control to maintain a steady speed at a crawl or full speed and everything in between regardless of track conditions or load

Flickering firebox

Chuffing sounds in sync with speed of locomotive

Powerful maintenance-free motor

Die-cast metal locomotive body| frame| and trucks

Die-cast metal tender body and trucks

Metal frame on tender

Engineer and fireman figures

Traction tires

Remote Features

The "throttle" rotates to increase and decrease speed in both forward and reverse

The red light at the top of the remote is a speed indicator; steady when in neutral and blinking faster as it accelerates

Long range control| up to 60 feet

Buttons for whistle sound| bell| special announcements| and ElectroCoupler activation

Multiple frequencies available| so multiple engines can run in the same layout at the same time

LionChief locomotives can run on any Legacy | TMCC| or conventional transformer layout with 18 volts of power supplied to the track

Requires three AAA alkaline batteries (not included)
