Description

MOTORIZED FILL SPOUT + SOUND EFFECTS! Broadway Limited Imports is proud to once again pioneer sound in HO! Our all-new Operating Water Tower is a faithful reproduction of the filling stations found on many water stops on Americas railroads. Water was an essential part of steam locomotive operation, so the Water Tower is a prototypically necessary addition to any steam route! Just attach the Water Tower to any standard 12V DC power supply (or stationary accessory DCC Decoder) and activate the motorized spout & sounds with the push of a button! Features: Durable ABS Construction Hand Painted Available Weathered & Unweathered Available Decorated & Undecorated Sound-Synchronized Vertical Fill Spout Movement Sound Equipped including sound effects for: Spout movement squeak Water hatch squeal & clang Water filling Talking Engineer Push button activated (included). Powered by standard 12V DC power supply or appropriate stationary / accessory DCC decoder such as AUXBOX or Digitrax DS64. Dimensions: Height: 84.5 mm Width: 47.2 mm (not including spout)
