Description For working really tight spaces there's no better locomotive for the job than an 0-4-0. Commonly found in industrial areas or working around railroad shops, these mighty mites packed a mean punch for their size. Navigating sharp curves and narrow spaces between towering buildings or even fighting traffic along city streets and docks, the 0-4-0 went to all the places bigger power couldn't and were often the first and last link in the chain between customers. Whether you love the operations of industrial railroading, or just want a scale switcher that will navigate the tight curves of your own layout, these switchers are your answer. LEGACY® Control System equipped – able to run in LEGACY® Control mode, in TrainMaster Command Control mode, or in Conventional mode with a standard transformer Bluetooth® Control - Operate with Universal Remote or LionChief® App Lionel Voice Control (LVC) - run your locomotive by speaking commands into your phone via LionChief® App Odyssey® II Speed Control IR Transmitter that works with LCS SensorTrack™ Powerful maintenance-free motor with momentum flywheel ElectroCoupler™ on rear of tender Directional lighting including operating headlight and back-up light on rear of tender Bicolor illuminated classification lights on the front of locomotive where applicable. Using a Legacy controller, change the color of the classification lights between white or green Traction tires Interior illumination in cab Die-cast metal locomotive body, pilot, and trucks Die-cast metal tender body and trucks High level of separately applied metal details Separately applied builder's plate Synchronized fan-driven smoke unit Adjustable smoke output Authentically detailed cab interior Cab "glass" windows Engineer and fireman figures Tethered connection between locomotive and tender for improved slow-speed operation Dual ElectroCouplers LEGACY® RailSounds® sound system featuring: CrewTalk™ dialog with different scenarios depending on whether the locomotive is in motion or stopped TrainSounds that mimic operating dialog when the locomotive is in motion or stopped Six official railroad speeds with CrewTalk dialog DynaChuff™ synchronized with 32 levels of intensity as the locomotive gains speed LEGACY® "Real-Time Quilling Whistle" control with instant response for realistic signature "quilling" and correctly timed warning signals - 5 different whistles to choose from for a more customized experience. Single hit or continuous mechanical bell sounds - 5 levels of bell pitching for customized sounds Sequence Control: plays the sound effects of an entire trip, including warning sounds and announcements, based on the movement and speed of the locomotive Current speed and fuel dialog, coal or oil loading sound effects The improved external features will include: 1. Tender body lowered to prototypical height 2. Working marker lights on tender and pilot beam 3. Drop plate between locomotive and tender 4. Increased number of separately applied detail parts on locomotive and tender including: a. Johnson bar and air piping below running boards b. Throttle lever c. Sand lines d. Electrical conduits e. Front wall cab details f. Additional railings, grab irons and steps g. Cab platforms h. Air compressor and air lines i. Builders plates Min Curve: O31
